RECONNAISSANCE AND OBSERVATION VERSION OF BMP

SPOT FIRE FIGHTER

VOP CZ is a state enterprise established by the Ministry of Defence of the Czech Republic for activities in the sector of research, development, manufacture, services and trade in the field of military materials. We celebrated 70th anniversary of its establishment in 2016. Within the terms of general repairs we have complexly modernised T-55 tanks into T-55AM2 tanks. Between 2003 and 2005 we prepared and realised modernisation of 30 pcs T-72 tanks into T-72M4 CZ tanks, including the T-72M CZ-W command post version and three modernised VT-72M4 CZ recovery tanks for the Czech Armed Forces.

We manufactured 107 PANDUR II 8x8 CZ wheeled armoured transporters for the Czech Armed Forces between 2009 and 2013. The delivery included development and manufacture of special vehicles in reconnaissance, engineering, ambulance and command post versions. We prepared 4 modernised PANDUR II 8x8 CZ vehicles for the military mission in Afghanistan.

Now we are strategic partner for MOD of the Czech Republic in project of new tracked IFV - development and production of 210 pcs.
